## interests.

## about me.

Formerly a hospitality professional with more than 14 years experience. I created my first website when I was 15, while I was in the hospitality industry. I elected to make the change from hospitality to web development 12 years later to satisfy my curiosity in technology and also help make the internet, whether for better or worse! I am eager to learn and improve my skills to become the best developer I can be.

## my education.

2015

**The Iron Yard | Orlando, FL**  
Front-end Engineering

2010

**Le Cordon Bleu College of Culinary Arts | Scottsdale, AZ**  
B.A. in Hospitality and Restaurant Management

## tech skills.

CSS / CSS 3  
SASS  
Bootstrap  
Angular Material

### Languages

Vanilla JS  
jQuery  
AngularJS  
restAngular  
ui-router  
Gulp  
dirPaginate  
Mocha/Chai  
ColdFusion

### API & Database

JSON  
Firebase  
restFul API  
Facebook Grid API  
Github API  
Etsy API  
OAuth  
mySQL express

### Design Software

Adobe Photoshop  
Sketch

## my projects.

### THE IRON YARD

#### Final Project: Lords of the Round Table

A web app created with Bootstrap SASS, AngularJS, RESTAngular, Facebook Grid API, Firebase, UI-Router, NodeJS, Facebook OAuth, Git, Gitflow, and Gulp. Scaffolding using a Yeoman generator.

Body of work also includes recreations of Github.com and Etsy.com using Github API and Etsy API, jQuery, and SASS, a mashup application using JSON from Youtube and Brewery DB, jQuery, SASS, and HTML, and a recreation of StackOverflow.com using Bootstrap SASS, AngularJS, RESTAngular, Firebase, NodeJS, Github OAuth, Git, Gitflow, and Gulp, and created JSON files for the Stack Overflow app.

### PERSONAL

#### Personal Portfolio Website

A simple, static web page created with Jekyll, SASS, and jQuery.

#### One Love to Rule Them All: A Wedding Website

For my fiancée and me. A static website created with Jekyll, SASS, and jQuery.

#### Jekyllized

Open Source Jekyll generator.
